ATTN: Chukchi Sea Draft SEIS Comment – Support Access to Alaska’s OCS Oil and Gas Resources

Dear Mr. Goll:

I write in support of oil and gas development enabled by Lease Sale 193 in the Chukchi Sea and the draft Supplemental Environmental Impact Statement (SEIS) recently released by your agency to address concerns expressed by the U.S. District Court in Alaska.

The federal government should expedite development of Alaska’s vast oil and natural gas reserves to support America’s economic recovery. Jobs in Alaska and across the nation depend on the opportunities that offshore oil and gas production can and will provide. In fact, a study by the University of Alaska found that new, Alaska offshore energy production could produce an annual average of 35,000 jobs over the next 50 years for the state of Alaska alone, with a total payroll of \$72 billion.

I urge the federal government to move forward with a robust development of Lease Sale 193 in the Chukchi Sea (and similar development of the Beaufort Sea), and to provide Alaska with revenue-sharing benefits. The public interest requires you to promote such a policy that encourages job creation, supports national security while growing the economy and providing the nation with much needed domestic energy supplies and less dependence on foreign energy imports.

Sincerely,

Name: _____
